
Lab Report

MATTHEW DENNY

THURSDAY 2ND APRIL, 2015

1 Objectives for this week

1. Read Reagans and McEvily (?) ☒
2. Work out pseudo code for initialization. ☐
3. Begin actual coding for implementation in R.

2 Results

1. Issue with MPSA author affiliation fixed.
2. I managed to get the appropriate libraries installed to extract emails for Transylvania County.
3. I am working on another function to deal with email directories that are not in .pst format.
4. I have been modifying code to read the emails into a pickle file which then needs to be read by the identify addresses function. This is still crashing on me.

3 Objectives for next week

1. Read Bolton and Dewatripont (?)
2. Read Hansen (?)
3. Work on analysis using Java code for Transylvania County.
4. Continue work on Implementation.
